Sarnacol 2170 Adhesive

Overview:	Sarnacol 2170 is a solvent-based reactivating adhesive used with a Sika Sarnafil Adhered system and/or flashing detail. It is also used to adhere flashings in Sarnafil waterproofing systems. It is formulated for adhering PVC membranes to properly prepared substrates such as wood, sheet steel, masonry, concrete and approved coverboards.
Composition:	See Material Safety Data Sheet for information.
Features:	Sarnacol 2170 is uniquely formulated to be compatible with Sarnafil membranes. Sarnacol 2170's shelf life is 12 months in a tighly closed container in temperatures between 86 and -4 degrees F (30 and -20 degrees C).
Packaging:	Sarnacol 2170 is supplied in 5 gal (18.9 L) steel containers weighing 45 lbs (20.4 kg).
Installation:	Sarnacol 2170 is roller-applied to both the membrane (except feltback) and substrate in the following manner: Apply Sarnacol 2170 to the substrate and allow to dry. After the substrate adhesive has dried completely, apply Sarnacol 2170 to the back side of the membrane, and allow to become tacky (producing strings) when touched with a dry finger. The Sarnacol 2170 on the membrane shall not be permitted to dry completely. The membrane is then placed on the substrate (mating adhesive surfaces) and rolled firmly into place with a water-filled, foam-covered lawn roller (vertical flashings are hand-rolled). Contact Sika Sarnafil for installation method with feltback membrane.
Availability:	Sarnacol 2170 is available directly from Sika Sarnafil Authorized Applicators when used within a Sika Sarnafil Roofing or Waterproofing System. Contact Sika Sarnafil or visit our website www.sikacorp.com for further information.
Warranty:	As a Sika Sarnafil-supplied accessory, Sarnacol 2170 is included in Sika Sarnafil's Standard or System Warranty.

Maintenance: Sarnacol 2170 requires no maintenance. Sika Sarnafil provides technical support. Technical staff is available to advise Technical: Applicators as to the correct installation method of Sarnacol 2170. **Technical Data:** Substrate Total Rate Isocyanurate Facer 1-3/4 gallons per square (0.71 liters/meter2) Smooth Plywood 1-1/2 gallons per square (0.61 liters/meter2) Metal 1-1/4 gallons per square (0.51 liters/meter2) Concrete Wall 1-3/4 gallons per square (0.71 liters/meter2) Georgia Pacific DensDeck® 1-3/4 gallons per square (0.71 liters/meter2) 1-1/2 gallons per square Georgia Pacific DensDeck Prime® (0.61 liters/meter2) Substrate Total Rate for Feltback Membrane Isocyanurate Facer 2-1/4 gallons per square (0.92 liters/meter2) Smooth Plywood 2 gallons per square (0.81 liters/meter2) Metal 1-3/4 gallons per square (0.71 liters/meter2) Concrete Deck 2-1/4 gallons per square (0.92 liters/meter2) Concrete Wall 2-1/4 gallons per square (0.92 liters/meter2) Masonry Wall 2-1/4 gallons per square (0.92 liters/meter2) Cellular Concrete 2 gallons per square (0.81 liters/meter2) (feltback membrane only) Georgia Pacific DensDeck® 2 gallons per square (0.81 liters/meter²) 2 gallons per square Georgia Pacific DensDeck Prime® (0.81 liters/meter2)
